Belmont School Responsible Use Agreement

When using information & communications technologies (ICT) at Belmont School I will always be a good digital citizen.

This means that I:

- Will be a confident and capable user of ICT.
I know what I do and do not understand about the technologies that I use. I will get help where I need it.
- Will use ICT for learning as well as other activities.
I understand that technology can help me to learn. I also know it can also be used to talk to people, to buy and sell things and to have my opinion heard. I know when and where it is OK to do each one.
- Will think carefully about whether the information I see online is true.
I know that it is easy to put information online. This means that what I see is not always right. I will always check to make sure information is real before I use it.
- Will be able to speak the language of digital technologies.
When people talk online the things they say can be quite different from a conversation they might have if they were sitting next to each other. I know that I must try to understand what people are saying before I react to them. If I am not sure, I can ask them or someone else to explain.
- Understand that I may experience problems when I use technology and that I will learn to deal with them.
I understand that there will be times when technology may not work as I expected it to, or that people may be mean or unkind to me online. When these things happen, I know that there are ways I can deal with it. I also know there are people I can go to, to get help if I don't know what to do next.
- Will always use ICT to communicate with others in positive, meaningful ways.
I will always talk politely and with respect to people online. I know that it is possible to bully or hurt people with what I say and do on the internet. I will think about the effect that my actions have on other people.
- Will be honest and fair in all of my actions using ICT.
I will never do anything online that I know will hurt anyone. I will make sure what I do is not against the law. I will make sure that my actions don't break the rules of the websites that I use. When I am not sure about what I am doing I will ask for help.

- Will always respect people's privacy and freedom of speech online.
I understand that some information is private. I will be careful when using full names, birthdays, addresses and photos of other people and of my own. I also know that I will not always agree with what people say online but that does not mean that I can stop them or use it as an excuse to be unkind to them.
- Will help others to become better digital citizens.
Being a good digital citizen is something that we all have to work at. If I know that my friends are having problems online, I will try to help them. If I see that someone is being unfairly treated online then I will speak up rather than just watch it happen.

Student Declaration

I understand that these guidelines for responsible use are to be followed when using any technology while at school or while on any school activity. I am aware that this may include the use of a device that the school does not own.

I understand that if I breach this responsible use agreement, I may lose access to school ICT services including the use of the internet, on school owned devices or any personally owned device used at school.

**PLEASE RETURN COMPLETED PARENT DECLARATION
TO THE GREEN LETTERBOX IN THE OFFICE BY
FRIDAY 22ND MARCH**

Parent Declaration

I understand that our school is supporting students as they learn the skills required to become successful digital citizens. Our school defines a digital citizen as someone who;

- is a confident and capable user of ICT
- uses technologies to participate in educational, cultural, and economic activities
- uses and develops critical thinking skills in cyberspace
- is literate in the language, symbols, and texts of digital technologies
- is aware of ICT challenges and can manage them effectively
- uses ICT to relate to others in positive, meaningful ways
- demonstrates honesty and integrity in their use of ICT
- respects the concepts of privacy and freedom of speech in a digital world
- contributes and actively promotes the values of digital citizenship

I understand that our school has a policy and associated procedures* which outlines the schools digital citizenship approach and how this supports teaching and learning.

*These documents are available on the school website in School docs section

I understand that the school provides access to the internet and other communications technologies because it believes that they enhance the teaching and learning process.

I understand that the school encourages responsible behaviour by students when using technology to help protect themselves and each other from experiencing harm online. I am aware that this “Responsible Use Agreement” is part of that, and that it encourages students to consider how their actions can affect themselves and those around them.

I have read the student declaration and have talked with my child about what it means to them. I am happy that my child understands what this means, and that they are capable of working within the guidelines.

I am aware that students can experience challenges when using technology, but that the school makes every effort to support students to manage those challenges effectively. I understand that by learning to deal with them in a safe environment with the appropriate support they will be better prepared to deal with those challenges in the future.

If I have questions or concerns about the way in which technology is being used by my child at school, I know the school is happy to discuss this with me, and I am aware that I am welcome to do this at any time.
